

BottleBee

Business Requirement Document (BRD)

Version 1.0 (Draft)

Tagline: **Cheers Delivered Fast.**

Executive Summary

BottleBee is a hyperlocal technology platform that connects customers with nearby licensed liquor stores and delivery partners. The objective is to provide a fast, secure and compliant ordering experience while enabling local licensed stores to increase digital sales. BottleBee acts as a marketplace and logistics platform rather than a seller of alcohol.

Vision

To become India's most trusted hyperlocal platform for licensed alcohol delivery through technology, reliability and compliance.

Mission

Deliver beverages from nearby licensed stores with a premium customer experience, intelligent logistics and scalable technology.

Business Objectives

- Deliver orders in 10–15 minutes where operationally feasible.
- Partner only with licensed stores.
- Build a scalable marketplace.
- Launch city by city.
- Provide a premium customer experience.

Stakeholders

Role	Description
Founder	Business owner and decision maker
Customers	End users ordering products
Store Owners	Licensed partner stores
Delivery Partners	Pickup and delivery
Operations Team	Daily operations
Technology Team	Development and maintenance

Scope (Version 1.0)
